My home is in a quiet neighborhood - 10 minutes from Karne Choling - with easy access to the Interstate.

One guest room is on street-level, with a private entrance through the garage (uplifted and clean). There is also access to the guest room through the main entrance. This guest room is large and well appointed and has a private bathroom with shower, on the same floor next to laundry and ironing facilities. A refrigerator is available for guests with special diet requirements.

The second guest room is on the main floor. The room is quiet with a window looking out to the back yard.

Guests are welcome to morning tea or coffee and a quiet moment on the terrace prior to leaving for or upon returning from their program.
